

## Special Features

1. Routes for transferring in a complex station are displayed in one map.
  2. Routes for using elevators are displayed in a simple 3-D map.
  3. Barrier-free facilities are easy to find in the map.
- (Toilets and stairs which cannot be used with wheel-chairs are excluded.)

## How to find a route for using elevators

Examples: How to get to ground level from Platform No.2, using Exit No.4 elevator.

- A** From Platform No. 2, go out the ticket gate, go up to the 1st basement by Exit No.1 elevator, go through the passage on the 1st basement and go up to ground level by Exit No.4 elevator.
- B** From Platform No. 2, go down to the 3rd basement by the elevator inside the ticket gate, go up to the 1st basement by the elevator located in the middle of Platform No. 3/No. 4, go out the ticket gate and through the passage, and go up to ground level by Exit No. 4 elevator.
